

WANT TO GET YOUR BRAIN SCANNED?

BYU researchers studying scrupulosity

Researchers seeking to understand the brain circuits involved in a religious or moral form of OCD called scrupulosity

Who are we looking for?

- Adults ages 18 to 35
- Fluent English speakers
- Members of The Church of Jesus Christ of Latter-day Saints
- Individuals with OCD
- OR individuals with no previous or current diagnosis of psychiatric disorders

You may also contact nielsenbrainlab@byu.edu for any further questions.

What will you receive?

- Participants will receive \$10 per hour spent completing the online surveys, clinical visit, and MRI scanning sessions
- There is no compensation for completing the Phase 1 (approx. 30 min), but you will receive compensation for phases 2-4 (approx. 7 hours total).

What will happen?

- **PHASE 1:** If you are interested in participating, please fill out the online survey at the QR code/linked below (approx. 30 mins)
- **PHASE 2:** we will reach out to you via email/phone to complete more online surveys and participate in a mental health assessment that will occur remotely (approx. 3 hours)
- **PHASES 3-4:** we will reach out to you via email/phone to participate in MRI scanning sessions and cognitive tasks (approx. 2 hours each phase)

QR Code to First Survey

If you are interested in participating, please fill out the survey at the QR code above or at this link:
